C•H•Reynolds advised the family shareholders of Biersack Group on the sale to LR Pure Systems GmbH

Frankfurt / Main, October 2024: LR Pure Systems GmbH, Ditzingen, a portfolio company of Peter Möhrle Holding, has acquired Biersack Group retroactively as of June 30, 2024. All employees will be taken on by LR Pure. Dominik and Michael Biersack will continue to manage the Beilngries site, which will remain the group's center for machining technologies. The C•H•R•CF industrials team led by Felix Hoch and Markus Kluge successfully advised the shareholders of Biersack Group on the transaction.

Biersack Group is a metal processing specialist focused on the high-precision machining of components. The group already supports its customers during the design phase of parts to achieve optimal results. Its customers include companies from various industries such as medical technology, automotive, semiconductor and aerospace.

"We are pleased that, as part of LR Pure Group, we now have a long-term-oriented partner who is securing our jobs in Beilngries. With complementary expertise, additional growth capital and entrepreneurial experience, the partnership supports us in implementing our growth and focus initiatives. Going forward, we aim to grow above market and further enhance the quality of our operations and processes. This will make us an even more attractive high-tech employer in the region", commented Dominik and Michael Biersack, who will continue to support the further development of the combined company as part of LR Pure's management team.

Headquartered in Ditzingen near Stuttgart, LR Pure is an international leader in the development of high-tech solutions for ultra-high-purity gas and fluid systems offering the highest levels of quality and expertise to the semiconductor, electronics, pharmaceutical and research sectors. Following the acquisition of Biersack Group, LR Pure will employ more than 270 people across four sites.

"With the acquisition of Biersack, we are securing important manufacturing know-how, significant CNC machining capacity, and expanding our technical capabilities in the production of complex mechatronic assemblies. This expansion enables us to meet the increasingly complex requirements of our customers in the semiconductor sector more comprehensively", said a company spokesperson.

With this transaction, C•H•Reynolds once again demonstrated its expertise in successfully advising family-owned businesses on succession solutions. C•H•Reynolds advised on the entire process through to closing.

The parties have agreed not to disclose the financial details of the transaction.
