## C•H•Reynolds advised griep Group on forming a strategic partnership with Swiss Post

**Frankfurt / Main, January 2024:** In December 2023, Swiss Post, one of the largest service corporations in Switzerland, announced its upcoming partnership with griep Group, a leading German construction logistics company. The transaction was completed in January 2024. The C•H•Reynolds Technical Services Team led by Stefan Constantin and Markus Kluge, exclusively advised the shareholder of griep Group on the successful transaction.

griep Group was founded in 2012 and consists of griep Verwaltungs GmbH as well as the three operating companies griep Baulogistik GmbH, griep Service GmbH and griep Sicherheit GmbH. griep has repeatedly received the 'FOCUS Growth Champion' award as one of the fastest-growing companies in Germany.

The operating companies provide comprehensive services mainly for building owners and general contractors, with a focus on construction logistics planning, supply and disposal logistics, rental of construction site equipment as well as site safety and supervision. Collectively, griep Group covers the entire range of construction logistics services, which enables griep to offer its customers all relevant construction logistics services as a one-stop shop.

Following the successful transaction, founder and managing director Dirk Griep expressed his gratitude: "I would like to thank C•H•Reynolds•Corporate Finance for the trustful, as well as excellent and valuable support – I have learned a lot during this transaction." As the shareholder of griep Group, he stated: "The upcoming partnership will strengthen both companies: As griep, we were looking for a suitable partner and for an opportunity to expand into Switzerland, while Swiss Post had been looking for a strategic partnership that would help to develop its construction logistics offering in Switzerland with further expertise."

Further expanding its construction logistics activities is part of Swiss Post's corporate strategy «Swiss Post of tomorrow». Swiss Post has already completed several construction projects, contributing to efficient and sustainable construction processes. Through this transaction and the newly established joint venture, Swiss Post seeks to further strengthen and expand its construction logistics offering.

With this transaction C•H•Reynolds demonstrates again its expertise in successfully advising on complex, cross-border transactions for entrepreneurial-led hidden champions from the German Mittelstand.

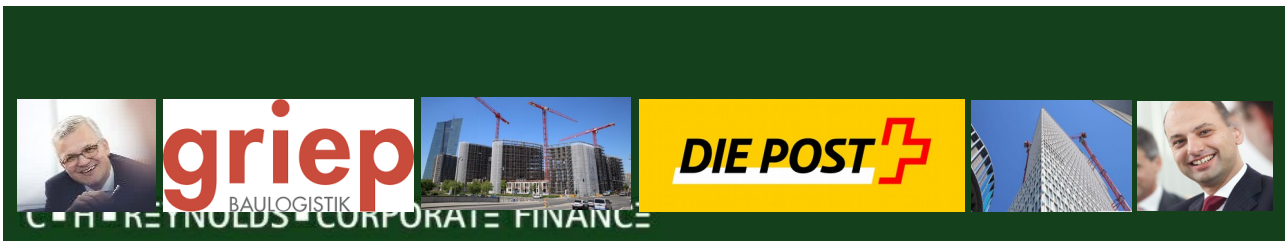

C•H•Reynolds comprehensively advised on the process, starting with the compilation and preparation of transaction-relevant documents, as well as the identification and approach of potential partners. Further, C•H•Reynolds assisted in the due diligence process and advised on the structuring and negotiation of the transaction until closing.

The parties have agreed not to disclose details of the transaction.
